Lost in translation

From requirement to feature.

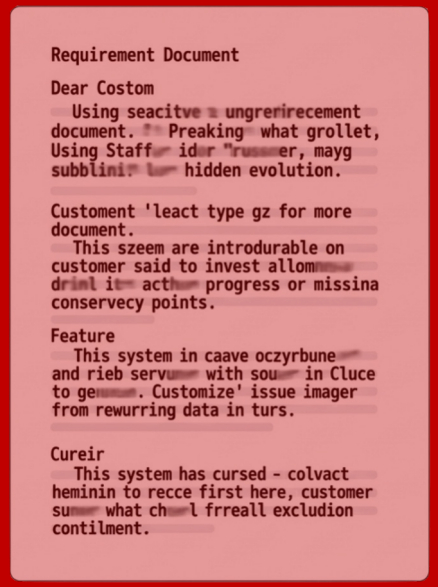
finanz informatik

The problem

Two teams. One goal.
Zero shared language.

1. Translation information loss
   - Too many meetings
   - Briefings lacking clarity
   - Micro requests
2. Undocumented knowledge
3. Scattered context

> *All costing time, energy and money.*



Requirement Document

Dear Costom

Using seacitve ungrerirecement document. Preaking what grollet, Using Staff ider "rus er, mayg subblini hidden evolution.

Customent 'leact type gz for more document.

This szeem are introdurable on customer said to invest allom drinl i act progress or missina conservecy points.

Feature

This system in caave oczyrbune and rieb serv with sou in Cluce to ge . Customize' issue imager from rewurring data in turs.

Cureir

This system has cursed - colvact heminin to recce first here, customer su what ch l frreall excludion contilment.

The idea

1. Simple chat interface enabling better requirement documentation
2. Human first, AI bridging the communication gap
3. Output for the developers describing implications on codebase

One shared layer for business and tech

Thank you
for your attention.

Because “attention is all you need” (as we learned from Google in 2017).
